C_ACDET Exam

SAP Certified - Configuring SAP Ariba Strategic Sourcing Suite

Exam Latest Version: 4.0

Question 1. (Multi Select)

You have defined a custom field to have a default value based on another field. You have verified that the defaulting happens correctly the first time. However, when the dependent field change value, your custom field does not change.

What scenarios could cause this? Note: There are 3 correct answers to this question.

A: The custom field has the property Lock Initial value enabled, which prohibits a field to be changed once it's set

B: Your dependent field does not have the property Refresh screen on value change enabled

C: The parameter Application.Base.RecomputeValueOnFieldChange is not enabled

D: The defaulting Expression sets a value that violates the custom field Validity Condition

E: Your custom field has the property Respect User Value enabled, and the user has manually entered another value into the field

Correct Answer: A, B, E

Question 2. (Single Select)

What is the recommended order of operations for creating a required Flex Master Data (FMD) type field in a project header?:
