Question 1. (Multi Select)

What must you do when you create an ABAP package?

There are two correct answers.

- A: Use the letter Z or Y as the first character in the name
- B: Assign the package to an application component
- C: Assign the package to a software component
- D: Declare what other packages can use the contents of the package.

Answer: A, C

Explanation:

A. Use the letter Z or Y as the first character in the name

Custom ABAP objects must begin with Z or Y to avoid conflicts with SAP standard packages.

C. Assign the package to a software component

Each ABAP package must belong to a software component, which organizes development and transport objects.

Question 2. (Single Select)

Which of the following can the Explain capability in Joule provide?

Choose the correct answer.

- A: Simple explanations of ABAP code
- B: Automatic generation of UIs
- C: Performance analysis of ABAP code
- D: Suggestions for database optimization

Answer: A

Question 3. (Multi Select)

An ABAP Cloud Project in ABAP Development Tools (ADT) allows you to connect to what kinds of system?

There are two correct answers.

- A: SAP BTP ABAP instance
- B: On-Premise ABAP system
- C: Embedded ABAP instance in SAP S/4HANA Cloud

Answer: A, C

Question 4. (Multi Select)

Which of the following predefined ABAP types are complete?

There are two correct answers.

- A: C
- B: D
- C: P
- D: I

Answer: B, D

Question 5. (Multi Select)

Which of the following can you use to denote a comment in ABAP?

There are two correct answers.

- A: // at the beginning of a line
- B: * at the beginning of a line
- C: -- anywhere in the line
- D: " anywhere in the line

Answer: B, D
