Question 1. (Multi Select)

Which two benefits are most commonly associated with AI-assisted development workflows?

(Select two.)

- A: Faster prototyping
- B: Guaranteed defect-free code
- C: Improved developer productivity
- D: Elimination of testing
- E: Reduced governance needs

Answer: A, C

Question 2. (Single Select)

An organization evaluates whether agentic AI is appropriate for a given use case. The decision depends on autonomy requirements and risk tolerance.

Which factor should carry the greatest weight?

- A: Trend popularity
- B: Business impact and risk
- C: Token efficiency
- D: Prompt length

Answer: B

Question 3. (Single Select)

An organization documents how AI decisions are made and retains logs of prompts and outputs. This practice supports multiple governance objectives.

Which objective is most directly enabled?

- A: Creativity enhancement
- B: Auditability and compliance
- C: Faster inference
- D: Reduced token usage

Answer: B

Question 4. (Single Select)

During automated data preparation, an AI system flags missing values and inconsistent formats across multiple data sources. This step occurs before analysis or modeling begins.

Which task category is the AI primarily performing?

- A: Feature engineering
- B: Data quality checking and cleaning
- C: Model evaluation
- D: Prompt optimization

Answer: B

Question 5. (Single Select)

Match each hosting option to its primary

Hosting Option:

- Cloud-hosted
- Locally hosted
- API-based shared model
- Edge-deployed

Characteristic:

- Elastic scalability
- Full data
- Rapid
- Low latency source

A: - Cloud-hosted Elastic scalability - Locally hosted Full data control -API-based shared Rapid onboarding

- Edge-deployed — Low latency near source

B: Cloud-hosted - Full data control - Locally Elastic scalability - API-based shared Low latency near source

- Edge-deployed — Rapid onboarding

C: - Cloud-hosted - Rapid onboarding - Locally hosted - LOW latency near source - API-based shared -

Elastic scalability - Edge-deployed - Full data control

D: - Cloud-hosted — Low latency near source - Locally hosted — Rapid onboarding - API-based shared

Full data control - Edge-deployed Elastic scalability

Answer: A
