Question 1. (Single Select)

What can you use to block a user account automatically when a risky sign-in is detected?

- A: Microsoft Entra ID Protection
- B: Microsoft Defender for Office 365
- C: Microsoft Entra Privileged Identity Management (PIM)
- D: Microsoft Defender for Identity

Answer: A

Explanation:

The correct answer is A. Microsoft Entra ID Protection. Microsoft Learn explains that Microsoft Entra ID Protection detects sign-in risk and user risk and can work with Conditional Access risk policies to automatically respond when suspicious authentication activity is identified. Microsoft documents specifically state that organizations can configure sign-in risk policies and user risk policies to automate responses such as blocking access, requiring multifactor authentication, or forcing password changes when risky activity is detected. Microsoft also notes that some very high-confidence risky sign-ins are automatically blocked by built-in protections.

The other options do not match this function. Microsoft Defender for Office 365 focuses on email, collaboration, and threat protection for tools like Exchange Online and Teams, not sign-in risk blocking. Microsoft Entra Privileged Identity Management (PIM) manages privileged role activation and governance, not risky sign-in detection. Microsoft Defender for Identity detects identity-related threats in hybrid identity environments, but the Microsoft feature used to automatically block risky sign-ins is Microsoft Entra ID Protection.

Question 2. (HOTSPOT)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements

You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.

Yes

No

You can use a Microsoft Entra security group to assign Microsoft 365 licenses.

You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.

Answer:

Answer Area

Statements

You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.

Yes

No

You can use a Microsoft Entra security group to assign Microsoft 365 licenses.

You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.

Question 3. (Multi Select)

Your organization has a Microsoft 365 subscription.

Which two tasks can you perform by using the Exchange admin center? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A: Create a mail flow rule.

B: Add a custom domain.

C: Assign a Microsoft Exchange license.

D: Create a shared mailbox.

Answer: A, D

Explanation:

The correct answers are A and D because both tasks are supported directly in the Exchange admin center (EAC). Microsoft Learn states that administrators can manage mail flow rules in Exchange Online from the EAC under Mail flow > Rules, which includes creating and managing transport rules for organizational email

handling. Microsoft Learn also states that administrators can create shared mailboxes in the EAC under Recipients > Mailboxes, where a shared mailbox can be added and then delegated to users.

Option B is incorrect because adding a custom domain is normally done in the Microsoft 365 admin center, specifically on the Domains page. Although Exchange can later work with accepted domains and related mail flow settings, the act of adding and verifying a custom domain is not an Exchange admin center task.

Option C is incorrect because license assignment is handled through Microsoft 365 or Microsoft Entra administrative tools, not the Exchange admin center.

Question 4. (HOTSPOT)

Your organization has a Microsoft 365 subscription.

A user named John is assigned an admin role as shown in the following exhibit.

Manage admin roles

John selected

Admin roles give users permission to view data and complete tasks in admin centers. Give users only the access they need by assigning the least-permissive role.

[Learn more about admin roles](#)

User (no admin center access)

Admin center access

Global readers have read-only access to admin centers, while Global admins have unlimited access to edit all settings. Users assigned other roles are more limited in what they can see and do.

Service Support Administrator ⓘ

SharePoint Administrator ⓘ

User Administrator ⓘ

User Experience Success Manager ⓘ

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

John can [answer choice].

- View all the users in the Microsoft Entra tenant
- view all the content in Microsoft SharePoint sites
- read all the content in Microsoft Exchange mailboxes
- perform eDiscovery of Microsoft 365 Copilot prompts

Answer:

John can [answer choice].

- View all the users in the Microsoft Entra tenant
- view all the content in Microsoft SharePoint sites
- read all the content in Microsoft Exchange mailboxes
- perform eDiscovery of Microsoft 365 Copilot prompts

Question 5. (HOTSPOT)

You open the Microsoft Entra admin center as shown in the following exhibit.

The screenshot displays the Microsoft Entra admin center interface. At the top left, the 'Identity Secure Score' is shown as 17.77%, with a note that the score refreshes every 24 hours. To the right is a 'Score History' chart showing a score of 0. Below these are filter tabs for 'All' (12), 'Security' (12), 'Best practice' (0), and 'Microsoft Defender for Identity' (0). A search bar contains 'Search by recommendation' and an 'Add filter' button. Below the search bar, it states '12 recommendations found'. A table lists the following recommendations:

Priority	Recommendation	Required licenses	Release type	Secure Score points
Low	Use least privileged administrative roles	Microsoft Entra ID Free	Generally available	1/1
Low	Designate more than one global admin	Microsoft Entra ID Free	Generally available	1/1
Medium	Enable password hash sync if hybrid	Microsoft Entra ID Free	Generally available	0/5
High	Do not expire passwords	Microsoft Entra ID Free	Generally available	8/8
High	Ensure all users can complete multifactor authentication	Microsoft Entra ID Free	Generally available	0.82/9
Medium	Do not allow users to grant consent to unreliable applications	Microsoft Entra ID Free	Generally available	0/4
High	Enable policy to block legacy authentication	Microsoft Entra ID Free	Generally available	0.73/8
High	Require multifactor authentication for administrative roles	Microsoft Entra ID Free	Generally available	0/10

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

Answer:

Answer Area

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles
