Question 1. (Single Select)

Master data in the SAP EWM system is identical to master data in the ERP system.

Choose the correct answer.

A: True

B: False

Answer: B

Explanation:

In SAP Extended Warehouse Management, master data is integrated and replicated from SAP ERP, but it is not identical because EWM may contain warehouse-specific extensions.

Question 2. (Multi Select)

Which of these functions are available in Warehouse Management?

There are two correct answers.

A: Managing inventory at the storage bin level

B: Processing sales orders

C: Purchasing goods

D: Processing goods movements

Answer: A, D

Explanation:

Warehouse Management in SAP Extended Warehouse Management focuses on detailed warehouse operations like bin-level stock and goods movements.

Question 3. (Single Select)

A storage bin is the smallest unit of space in a warehouse.

Choose the correct answer.

A: True

B: False

Answer: A

Explanation:

In SAP Extended Warehouse Management, a storage bin represents the smallest addressable space in the warehouse.

Question 4. (Multi Select)

Product Master Data includes which of the following pieces of information?

There are three correct answers.

A: Product properties

B: Product stock levels

C: Product unit of measure

D: Product classification

Answer: A, C, D

Explanation:

Product master data in SAP Extended Warehouse Management includes attributes, units, and classifications.

Question 5. (Single Select)

What is the name of the decentralized EWM option available for SAP S/4HANA Cloud Private Edition?

Choose the correct answer.

- A: in-stack
- B: Advanced option
- C: extra-stack
- D: Stock Room Management

Answer: C

Explanation:

In SAP S/4HANA Cloud Private Edition, the decentralized EWM deployment option is called extra-stack, meaning EWM runs on a separate system.
