Question 1. (Multi Select)

Scenario: A Citrix Engineer is working on ICA policies to restrict sharing of client clipboard data to user sessions. However, the engineer wants to allow some specific formats to be shared.

Which two policies should the engineer configure to allow this?

(Choose two.)

Response:

- A: Client clipboard write allowed formats
- B: Restrict session clipboard write
- C: Restrict client clipboard write
- D: Session clipboard write allowed formats

Correct Answer: B, D

Question 2. (Single Select)

What type of credentials do users need to present when using smart card authentication in a Citrix environment?

- A: A unique PIN code
- B: A username and password combination
- C: A physical smart card token
- D: A digital signature generated by the Citrix StoreFront

Correct Answer: C

Question 3. (Single Select)

In a multi-zone environment, if a user's preferred zone is unavailable, what is the next action taken based on zone preference settings?

- A: The user is automatically logged off.
- B: The user's session is disconnected.

- C: The user is redirected to their second-choice zone.
- D: The user is prompted to select an alternative zone.

Correct Answer: C

Question 4. (Single Select)

Scenario: A Citrix Engineer needs to integrate the current Citrix Gateway with the StoreFront servers. During the wizard setup, the engineer was asked to add two Secure Ticket Authority (STA) servers as Citrix leading practice for high availability.

The engineer should add two _____ servers as STA servers to accomplish this.

- A: Delivery Controller
- B: StoreFront
- C: Citrix Cloud Connector
- D: Domain Controller

Correct Answer: A

Question 5. (Single Select)

Scenario: A Citrix Engineer recently completed the configuration and implementation of various Workspace Environment Management (WEM) actions for different users within an environment. The engineer would like to confirm that all the appropriate configurations were completed for each of the users and decides to launch the Modeling Wizard.

What is the next step the engineer can take to confirm that each user's actions were correctly configured?

- A: Select the account name of the user, complete the wizard and review the output on the Resultant User Groups screen.
- B: Add any group name of which the user is a member, complete the wizard and review the output on the resultant Actions screen.
- C: Select the account name of the user, complete the wizard and review the output on the Resultant Actions screen.
- D: Add any group name of which the user is a member, complete the wizard and review the output on the

Resultant User Groups screen.

Correct Answer: C
