Question 1. (Multi Select)

RISE with SAP Methodology covers the "entire engagement lifecycle." Which of the following phases are mentioned as part of this complete cycle?

There are three correct answers.

- A: Customer discovery and onboarding
- B: Modernizing and running
- C: Selling the old systems
- D: Continuous innovation
- E: Partner contract negotiation

Answer: A, B, D

Question 2. (Single Select)

What is the primary function of the recommended toolchain (SAP LeanIX, SAP Signavio, and SAP Cloud ALM) within the RISE with SAP Methodology offering?

Choose the correct answer.

- A: To operate independently, allowing customers to pick and choose solutions without worrying about integration.
- B: To guide customers throughout their transformation by providing a seamless, integrated flow of data across different phases.
- C: To focus only on the "continuous innovation" phase after the main transformation project is complete.
- D: To fully automate the transformation process, removing the need for expert guidance or a methodology.

Answer: B

Question 3. (Single Select)

Why is it important to establish a clear data model and a good governance for the integrated toolchain?

Choose the correct answer.

A: Good governance is not important as the transformation is usually managed in a large transformation project office.

B: A good data model and governance only creates extra effort and alignment and therefore is not needed for using the integrated toolchain.

C: A good data model and governance ensures clean data flows and a clear understanding across different stakeholders where which data should be maintained and mastered, therefore leading to reliable data in the long run.

D: A data model does not define where which data object is mastered and how the direction of the information flows.

Answer: C

Question 4. (Multi Select)

During the As-Is Assessment phase, which of the following activities are described to take place? (Select all that apply)

There are two correct answers.

A: Modeling the current enterprise architecture in SAP LeanIX.

B: Designing the future-state processes and mapping them to the target application architecture.

C: Documenting the current process architecture in SAP Signavio.

D: Translating high-level road maps into detailed project plans and test cases in SAP Cloud ALM.

Answer: A, C

Question 5. (Single Select)

You are a key consultant for N3C's Fit for Future program. To effectively guide the team, you must have a clear understanding of each persona's responsibility and their designated SAP tool. Based on the scenario,

which of the following statements accurately describes a persona's role and the tool they will use to achieve the program's goals?

Choose the correct answer.

A: The Business Process Manager will use SAP Cloud ALM to identify potential process improvements and inefficiencies.

B: The Enterprise Architect will use SAP Signavio to manage the application portfolio and plan the future IT landscape.

C: The IT Project Manager will use SAP LeanIX to oversee the implementation, testing, and documentation of the new ERP system.

D: The Enterprise Architect will use SAP LeanIX to manage the application portfolio and plan the target IT architecture.

E: Jane, the CEO, will use SAP Signavio to personally document the procurement processes and identify cost-saving opportunities.

F: The IT Project Manager will use SAP Signavio to analyze and document the "as-is" business processes before the transformation.

Answer: D
