### Question 1. (Single Select)

Universal Containers needs to write their Heroku application's logs to two destinations: an on-premise Syslog log server and a cloud analytics provider that ingests logs using an HTTPS endpoint.

What should an Architect recommend in this scenario?

- A: Publish all logs to Apache Kafka on Heroku, and create a separate app that consumes and distributes log messages.
- B: Write all logs to Heroku Redis as a buffer and use an add-on to send them to both destinations.
- C: Add a logging library to the application source that sends all logs directly to both destinations.
- D: Write all logs to stdout, and configure a separate log drain for each destination.

**Correct Answer: D**

### Question 2. (Multi Select)

A client has data in a production Heroku Postgres database, and needs to quickly get access to a subset of that data for reporting needs.

Which two features does Heroku Dataclips provide to enable this? (Choose two.)

- A: JSON export of query results, with CORS support
- B: CSV export of query results
- C: A simple REST API access to query results
- D: Postgres dump file of query results

**Correct Answer: A, B**

**Explanation:**

-<https://devcenter.heroku.com/articles/dataclips>

### Question 3. (Single Select)

Universal Containers intends to build an app which will accept card payments. The app also needs to store, process, and transmit cardholder data.

Which Heroku architecture should an Architect recommend?

A: Common Runtime with secure, isolated containers for running the app's code.

B: A Private Space restricted to a set of trusted IP ranges.

C: A Shield Private Space with a Shield Postgres add-on.

D: A Private Space with Internal Routing enabled on the app.

**Correct Answer: C**

### Question 4. (Single Select)

A client wants to create a secure network connection between Heroku applications running in a Private Space and an AWS VPC.

Which Heroku feature should an Architect recommend to create the connection?

A: Internal Routing

B: Private Space Peering

C: Private Space VPN connections

D: Heroku Connect

**Correct Answer: C**

#### Explanation:

### Question 5. (Multi Select)

A client wants to add CPU-intensive video processing functionality to their Heroku web application.

Which two strategies should an Architect recommend for implementing this functionality? (Choose two.)

- A: Add a new process type for worker dynos that pull video processing jobs from a queue.
- B: Attach a video processing add-on from the Heroku Elements Marketplace to the application.
- C: Delegate video processing tasks to the app's staging version to remove load from the production app.
- D: Divide each video processing task across multiple web dynos to mitigate added CPU load.

**Correct Answer: A, B**
