Question 1. (Multi Select)

You are configuring Gmail for your company and want to implement a layered security approach. You decide to implement industry- standard email authentication protocols. What should you do? Choose 2 answers

- A: Configure a blocked senders rule to block all emails from unknown senders.
- B: Configure DKIM to digitally sign outbound emails and verify their origin.
- C: Disable IMAP for your organization to prevent external clients from accessing Gmail.
- D: Set up SPF records to specify authorized mail servers for your domain.
- E: Enable a default email quarantine for all users to isolate suspicious emails and determine if the messages haven't been authenticate

Answer: B, D

Question 2. (Single Select)

Your company has just started using Search Ads 360. You need to limit access to Additional Google services for your entire organization by using the Admin console. Only the marketing team and a specific group of users from the web design team should have access. What should you do?

- A: Enable Search Ads 360 for the marketing organizational unit (OU). Create a new group in the Admin console that includes the web design team users who need access. Enable Search Ads 360 for that group.
- B: Enable Search Ads 360 for both the marketing and web design team organizational units (OUs). Create a group to explicitly deny access to Search Ads 360. Assign the group to the web design users who should not have access.
- C: Enable Search Ads 360 for the marketing organizational unit (OU). Create a sub-OU under the marketing OU. and move the web design team users who need access into this sub-OU.
- D: Enable Search Ads 360 at the top level of your organizational structure.

Answer: A

Question 3. (Single Select)

Your company is streamlining workflows by creating custom applications for tasks like filing expense reports or requesting time off. You need to identify a Google Workspace solution to develop these applications. Your development team has only basic coding knowledge. What should you do?

- A: Enable Gemini for Workspace. Direct users to use generative AI across Gmail and Drive to simplify the submission of expense reports.
- B: Direct employees to use Google Forms to collect data and create basic workflows.
- C: Enable AppScript for your organization and allow employees to build add-ons to existing Workspace solutions.
- D: Enable AppSheet for your organization.

Answer: D

Question 4. (Multi Select)

You are configuring Gmail for your company and want to implement a layered security approach. You decide to implement industry- standard email authentication protocols. What should you do? Choose 2 answers

- A: Configure a blocked senders rule to block all emails from unknown senders.
- B: Configure DKIM to digitally sign outbound emails and verify their origin.
- C: Disable IMAP for your organization to prevent external clients from accessing Gmail.
- D: Set up SPF records to specify authorized mail servers for your domain.
- E: Enable a default email quarantine for all users to isolate suspicious emails and determine if the messages haven't been authenticate

Answer: B, D

Question 5. (Single Select)

Your company has offices in several different countries and is deploying Google Workspace. You're setting

up Google Calendar and need to ensure that, when a user is creating a Google Calendar event, rooms are suggested in a nearby office. What should you do?

A: Restrict room sharing to a dynamic group based on user location.

B: Assign building ID, floor name, and floor section to define users' work locations based on defined buildings and rooms.

C: Add your users to Google Groups by location. Add room resources to the corresponding groups.

D: Add your users to organizational units (OUs) by location. Add room resources to the corresponding OUs.

Answer: D
