Question 1. (Single Select)

You need to meet the technical requirements for the creation of the sensitivity labels.

To which user or users must you assign the Sensitivity Label Administrator role?

- A: Admin1 only
- B: Admin1 and Admin4 only
- C: Admin1 and Admin5 only
- D: Admin1, Admin2, and Admin3 only
- E: Admin1, Admin2, Admin4, and Admin5 only

Correct Answer: D

Explanation:

To meet the requirement that all administrative users must be able to create Microsoft 365 sensitivity labels, we need to assign the Sensitivity Label Administrator role to the correct users.

Sensitivity Label Administrator Role Responsibilities

This role allows users to:

- Create and manage sensitivity labels in Microsoft Purview.
- Publish and configure auto-labeling policies.
- Modify label encryption and content marking settings.

Review of Admin Roles from the Table:

Admin	Role Assigned	Can Create Sensitivity Labels?
Admin1	Global Reader	<input type="checkbox"/> No, read-only permissions.
Admin2	Compliance Data Administrator	<input type="checkbox"/> Yes, can manage compliance data, including labels.
Admin3	Compliance Administrator	<input type="checkbox"/> Yes, has full compliance management, including labels.
Admin4	Security Operator	<input type="checkbox"/> No, this role is focused on security alerts and response.
Admin5	Security Administrator	<input type="checkbox"/> No, primarily focused on security policies and threat management.

Users that must be assigned the Sensitivity Label Administrator (Data Administrator) %I Admin3 (Compliance Administrator) %I Admin5 assigned this role to fulfill the requirement that all admins can create labels).

Question 2. (DRAGDROP)

You need to meet the technical requirements for the Site1 documents.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

-
-
-
-
-

Answer Area

Correct Answer:

Actions

Create a sensitivity label.

Wait 24 hours and then turn on the policy.

Create a sensitive info type.

Create a retention label.

Create an auto-labeling policy.

Answer Area

Create a sensitive info type.

Create a retention label.

Create an auto-labeling policy.

Question 3. (HOTSPOT)

You need to meet the technical requirements for the confidential documents.

What should you create first, and what should you use for the detection method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Create first:

- A Compliance Manager assessment
- A content search
- A DLP policy
- A sensitive info type
- A sensitivity label

Use for detection method:

- Dictionary
- File type
- Keywords
- Regular expression

Correct Answer:

Answer Area

Create first:

- A Compliance Manager assessment
- A content search
- A DLP policy
- A sensitive info type
- A sensitivity label

Use for detection method:

- Dictionary
- File type
- Keywords
- Regular expression

Question 4. (Multi Select)

You have a Microsoft 365 subscription.

You need to ensure that users can apply retention labels to individual documents in their Microsoft SharePoint libraries.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A: From Microsoft Defender for Cloud Apps, create a file policy.
- B: From the SharePoint admin center, modify the Site Settings.
- C: From the SharePoint admin center, modify the records management settings.
- D: From the Microsoft Purview portal, publish a label.
- E: From the Microsoft Purview portal, create a label.

Correct Answer: D, E

Explanation:

To allow users to apply retention labels to individual documents in Microsoft SharePoint libraries, you need to create a retention label and publish the label.

In Microsoft Purview, retention labels define how long content should be retained or deleted. You must first create a label that specifies the retention rules. After creating the label, you must publish it so that it becomes available for users in SharePoint document libraries. Once published, users can manually apply the retention label to individual documents.

Question 5. (Single Select)

You need to meet the retention requirement for the users' Microsoft 365 data.

What is the minimum number of retention policies required to achieve the goal?

- A: 1
- B: 2
- C: 3
- D: 4
- E: 6

Correct Answer: B

Explanation:

The requirement states that all Microsoft 365 data for users must be retained for at least one year. In Microsoft 365, retention policies must be configured for each type of data storage.

Step 1: Identifying Where Data is Stored

From the case study, users store data in the following locations:

• SharePoint Online sites

• OneDrive accounts

• Exchange email

• Exchange public folders

• Teams chats

- Teams channel messages

Since these locations fall under two broad categories:

- Microsoft Exchange data (Emails, Public folders)

- SharePoint, OneDrive, and Teams data

Step 2: Required Retention Policies

1p . A single retention policy can cover:

- SharePoint Online

- OneDrive

- Microsoft Teams

2. A second retention policy is required for:

- Exchange (Emails & Public Folders)

Thus, the minimum number of retention policies required to meet the requirement is 2.

Microsoft 365 retention policies can be applied broadly across multiple services with just two policies:

- One for Exchange & Public Folders

- One for SharePoint, OneDrive, and Teams

There's no need for separate policies for each individual workload unless different retention durations are required, which is not stated in the requirement.
