MD-102 Exam

Endpoint Administrator Exam

Exam Latest Version: 14.0

## Question 1. (DRAGDROP)

You have a Microsoft 365 subscription that includes Microsoft Intune.

You need to implement a Microsoft Defender for Endpoint solution that meets the following requirements:

- Enforces compliance for Defender for Endpoint by using Conditional Access
- Prevents suspicious scripts from running on devices

What should you configure? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Answer Area
<input type="text" value="A device restriction policy"/>	Enforces compliance: <input type="text"/> Prevents suspicious scripts: <input type="text"/>
<input type="text" value="A security baseline"/>	
<input type="text" value="An attack surface reduction (ASR) rule"/>	
<input type="text" value="An Intune connection"/>	

## Correct Answer:

Features	Answer Area
<input type="text" value="A device restriction policy"/>	Enforces compliance: <input type="text" value="An Intune connection"/> Prevents suspicious scripts: <input type="text" value="An attack surface reduction (ASR) rule"/>
<input type="text" value="A security baseline"/>	
<input type="text" value="An attack surface reduction (ASR) rule"/>	
<input type="text" value="An Intune connection"/>	

## Question 2. (HOTSPOT)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	<input type="radio"/>	<input type="radio"/>
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	<input checked="" type="radio"/>	<input type="radio"/>
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	<input type="radio"/>	<input checked="" type="radio"/>
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	<input type="radio"/>	<input checked="" type="radio"/>

Question 3. (ORDERLIST)

You need to meet the technical requirements for the LEG department computers.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Configure the commercial ID on the LEG department computers.		
Create an Azure Machine Learning service workspace.		
Create an Azure Log Analytics workspace.		
Install the Microsoft Monitoring Agent on the LEG department computers.		
Add a solution to a workspace.		

- A: Configuration the commercial ID on the LEG department computers.
- B: Create an Azure Machine Learning service workspace.
- C: Create an Azure Log Analytics workspace.
- D: Install the Microsoft monitoring agent on the LEG department computers.
- E: Add a solution to a workspace.

**Correct Answer: C, E, A**

**Explanation:**

---

**Question 4. (Single Select)**

Which user can enroll Device6 in Intune?

- A: User4 and User2 only
- B: User4 and User 1 only
- C: User1, User2, User3, and User4
- D: User4. User Land User2 only

**Correct Answer: C**

**Question 5. (Multi Select)**

You have an Azure AD tenant and 100 Windows 10 devices that are Azure AD joined and managed by using Microsoft Intune.

You need to configure Microsoft Defender Firewall and Microsoft Defender Antivirus on the devices. The solution must minimize administrative effort.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A: To configure Microsoft Defender Antivirus, create a Group Policy Object (GPO) and configure the Windows Defender Antivirus settings.

B: To configure Microsoft Defender Firewall, create a device configuration profile and configure the Device restrictions settings.

C: To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Endpoint protection settings.

D: To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Device restrictions settings.

E: To configure Microsoft Defender Firewall, create a device configuration profile and configure the Endpoint protection settings.

F: To configure Microsoft Defender Firewall, create a Group Policy Object (GPO) and configure Windows Defender Firewall with Advanced Security.

**Correct Answer: C, E**

**Explanation:**

To configure Microsoft Defender Firewall and Microsoft Defender Antivirus on Azure AD joined devices that are managed by Intune, you need to create a device configuration profile and configure the Endpoint protection settings. You can use this profile to configure various settings for firewall and antivirus protection on the devices.
