Ultimate Guide to HCIP-Storage Certification: H13-624 Exam Tips

Ready to **ace** the HCIP-Storage certification exam? If you're aiming for the **H13-624** test, you're on the right path to becoming a *storage solutions* expert. In this guide, we'll cover everything you need to know to prepare effectively and pass the exam with confidence.

Understanding HCIP-Storage Certification

The **HCIP-Storage** certification validates your skills and knowledge in implementing **Huawei Storage Solutions**. It's crucial for professionals who want to advance in *storage technology* and improve their careers. This certification opens up many opportunities in the *IT field*.

Key Topics of the H13-624 Exam

Your success in the exam will depend on your understanding of essential topics such as:

- Storage architecture and design
- Data protection and disaster recovery
- Storage management and troubleshooting
- Performance optimization
- Huawei Storage Solutions

Using H13-624 Exam Questions for Practice

Practicing with **H13-624 exam questions** is vital for your preparation. These questions will help you understand the exam format and the types of questions you will encounter. Consider using practice exams to gauge your readiness. You can find valuable resources at this link.

Creating Your HCIP-Storage Study Guide

A study guide tailored to the **HCIP-Storage certification** can make your preparation more efficient. Here are some steps to create your study guide:

- Identify key areas to focus on based on the exam syllabus.
- Organize **study materials**, notes, and resources systematically.
- Set a study schedule to cover all topics leading to the exam date.

Taking H13-624 Practice Tests

Taking **practice tests** is essential for solidifying your knowledge. These tests mimic actual exam conditions and help build your confidence. Aim to take multiple practice tests to cover different topics thoroughly. Resources for these tests can be accessed at <u>this site</u>.

Staying Updated on Huawei Storage Solutions

As technology is constantly evolving, staying updated on **Huawei Storage Solutions** is necessary. Follow official *Huawei updates*, join forums, and participate in community discussions to stay in the loop.

Final Tips for Success

Here are some final tips for passing the **HCIP-Storage certification exam**:

- Consistently review your study materials.
- Join study groups for motivation and support.
- Manage your time effectively during the exam.
- Stay relaxed and focused on the exam day.

By following this guide, you'll be well-prepared and set to conquer the **HCIP-Storage exam**. Good luck, and remember to stay *dedicated*!

Question: 1			
The scale-out storage system sare stored in different cabinet without service interruption of	s. If M nodes or M disks	are faulty, the system	can still read and write data
A. TRUE B. FALSE			
		-	Answer: A
		-	
Question: 2			
An Internet customer has dep devices. During actual service for a remote replication pair. \pair?	running, the customer	discovers that there are	e multiple running statuses
A. After a pair is disconnected configuration inconsistency be "To be recovered."	•	· ·	•
B. When the pair running state is interrupted (not manually).	us is "Split", the pair rela	ationship between the	primary and secondary LUNs
C. When the pair running state LUNs is complete.	us is "Normal", data syn	chronization between	the primary and secondary
D. When the pair running state secondary LUNs must be man	•	•	· · · · · · · · · · · · · · · · · · ·
			Answer: C
Question: 3			

After purchasing a Huawei OceanStor Dorado series storage system, a customer needs to configure basic

Questions & Answers PDF

storage services in the storage system. Which of the following operations are optional in the basic service configuration?

- A. Configuring connectivity between a host and the storage system
- B. Creating a port group
- C. Creating a mapping
- D. Creating a LUN group

Answer: B, D

Question: 4

When delivering a flash storage project, Huawei engineers introduced the multi-tenant feature of flash storage to the customer. This feature isolates service dat

- a. Although different tenants cannot access each other's LUNs, they can access each other's file system.
- A. TRUE
- B. FALSE

Answer: B

Question: 5

Huawei OceanStor Pacific series is an intelligent scale-out storage product that supports large-scale scale-out and delivers high reliability. Which of the following statements are false about the product's reliability?

A. In terms of data reliability, multiple RAID policies are supported based on the traditional disk-level RAID mode.

- B. The product adopts Kunpeng processors to integrate functions of multiple chips and effectively improve hardware reliability.
- C. The product leverages link aggregation to ensure transmission link redundancy and performs link switchover or isolation to ensure service continuity if a link becomes faulty or subhealthy.
- D. The product uses the multi-copy technology to implement the intra-node RAID function. If a node is faulty, the system reliability is not degraded and even remains higher than that of the EC mechanism.

Answer: A, D
