Question 1. (Single Select)

Your customer is making a decision on whether to move to Google Cloud. Their key concern is about 10,000 VMs that are part of their IT infrastructure used across more than 110 applications. They are apprehensive of too many changes at this stage. They want to get to Google Cloud in the easiest way possible with minimal disruption. What option would you recommend for them?

- A: Use Migrate for Anthos
- B: Lift and shift the VMs to serverless options like App Engine Flex.
- C: Re-architect on-prem to use Kubernetes and then slowly extend and bridge the on-prem data center to the Google Cloud data center.
- D: Use Migrate for Compute

Answer: D

Question 2. (Multi Select)

Your organization wants to be sure that its expenditures on cloud services are in line with the budget. Which two Google Cloud cost management features help your organization gain greater visibility into its cloud resource costs? (Choose two.)

- A: Billing dashboards
- B: Resource labels
- C: Sustained use discounts
- D: Financial governance policies
- E: Payments profile

Answer: A, B

Question 3. (Single Select)

Your customer currently has a hybrid cloud setup including their on-premises data center and AWS. They

are consolidating all their services on Google Cloud as part of a modernization plan and want to spend less IT effort in the future. There are about 10 MySQL and 25 PostgreSQL databases across the two DCs. What is the best option to for them?

- A: Use the Data Catalog Service to manage the metadata of the databases
- B: Use Cloud Dataflow service and setup Google's Cloud SQL as the sink and the others as the source, which will cause the data to flow in as expected.
- C: Use the Database Migration Service
- D: Use the Bare Metal Solution and copy the databases directly as they are on-premises and on AWS.

Answer: C

Question 4. (Single Select)

A partner of yours used to have their own private data center. Your company was already on Google Cloud and now they have also moved to Google Cloud. You are investigating whether there are ways to collaborate better or shared services. What would be one good option to consider?

- A: Use Private Service Access within Google Cloud.
- B: Use VPC Peering to share resources privately between your two organizations.
- C: Use public IP addresses as before
- D: It will automatically be routed internally only.
- E: Use VPC Shared Networks to share common resources.

Answer: B

Question 5. (Single Select)

A video game organization has invested in cloud technology to generate insights from user behaviors. They want to ensure recommendations of games are aligned to players' interests. What may have prompted this business decision?

- A: Customers expect faster time to market for games.
- B: Employees expect source code changes to be deployed faster.

C: Customers expect a personalized experience.

D: Employees expect more predictable data management spending.

Answer: C
