Question 1. (Multi Select)

You are tasked with securing devices at Level 2 and Level 3 of an ICS network. Which of the following actions should you prioritize to protect these devices from external threats?

(Select all that apply)

Response:

- A: Implement network segmentation between Level 2 and Level 3
- B: Use encryption for data communication between Level 2 and 3 devices
- C: Disable physical access to all SCADA systems
- D: Apply security patches and firmware updates regularly

Correct Answer: A, B, D

Question 2. (Single Select)

Why is it important to regularly review and update ICS security policies?

Response:

- A: To reduce system performance
- B: To adapt to evolving threats and changes in technology
- C: To prevent network access
- D: To disable system monitoring

Correct Answer: B

Question 3. (Single Select)

What is the primary purpose of encryption in wireless communication within ICS networks?

Response:

- A: To increase data transmission speed
- B: To reduce the amount of data transmitted
- C: To protect data from unauthorized access during transmission

D: To improve signal strength

Correct Answer: C

Question 4. (Single Select)

Which key component of an incident response plan outlines how an organization will communicate internally and externally during an incident?

Response:

- A: Response actions
- B: Communication plan
- C: Forensics procedures
- D: Threat modeling

Correct Answer: B

Question 5. (Single Select)

What is a common challenge when implementing encryption for ICS communication protocols?

Response:

- A: Limited processing power of field devices
- B: Lack of bandwidth
- C: Difficulty in establishing secure wireless networks
- D: Excessive latency caused by encryption algorithms

Correct Answer: A
