### Question 1. (Single Select)

Which statement is a factor that will influence the implementation of the information security management system?

- A: The ISMS will be separate from the organization's overall management structure
- B: The ISMS will encompass all controls specified within ISO/IEC 27001
- C: The ISMS will be scaled to the controls according to the needs of the organization
- D: The ISMS will be operated as an independent process within the organization

**Correct Answer: C**

#### **Explanation:**

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

### Question 2. (Single Select)

In which clause would the requirements for internal audit be found?

- A: Planning
- B: Operation

C: Performance Evaluation

D: Improvement

**Correct Answer: C**

**Explanation:**

The requirements for internal audit are explicitly placed in Clause 9.2 (Performance Evaluation) of ISO/IEC 27001:2022. The standard requires:

“The organization shall conduct internal audits at planned intervals to provide information on whether the information security management system... conforms to the organization’s own requirements... and to the requirements of this document.” (9.2.1)

“The organization shall plan, establish, implement and maintain an audit programme(s)...” (9.2.2)

This clause clearly falls under Performance Evaluation (Clause 9), not Planning (Clause 6), Operation (Clause 8), or Improvement (Clause 10). Therefore, the correct answer is C.

**Question 3. (Single Select)**

Which output is a required result from risk analysis?

A: Risk acceptance criteria

B: Determined levels of risk

C: Risk treatment control options

D: Prioritized risks for treatment

**Correct Answer: B**

**Explanation:**

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

“assess the potential consequences that would result if the risks identified... were to materialize;”

“assess the realistic likelihood of the occurrence of the risks identified;”

“determine the levels of risk.”

This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is B: Determined levels of risk.

#### Question 4. (Single Select)

Identify the missing word in the following sentence.

The organization shall determine the [ ? ] of interested parties relevant to information security.

A: requirements

B: number

C: structure

D: influence

**Correct Answer: A**

#### Explanation:

Clause 4.2 of ISO/IEC 27001:2022 states:

“The organization shall determine: a) interested parties that are relevant to the information security management system; b) the relevant requirements of these interested parties; c) which of these requirements will be addressed through the ISMS.”

This confirms that the missing word is requirements. Neither number, structure, nor influence are specified in the standard.

#### Question 5. (Single Select)

What is the name of the control clause used to control information security breaches within Annex A of ISO/IEC 27001?

- A: Information security event reporting
- B: Information security event management
- C: Response to information security events
- D: Reporting information security incidents

**Correct Answer: A**

**Explanation:**

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A in ISO/IEC 27001 refers directly to ISO/IEC 27002 for control guidance. In ISO/IEC 27002:2022, Clause 6.8 is titled:

“Information security event reporting – Information security events should be reported through appropriate management channels as quickly as possible.”

This control ensures breaches, incidents, or suspected issues are reported for action. The other options (B, C, D) are not the exact titles in Annex A. The official title is Information security event reporting, confirming Answer: A.
