Question 1. (Single Select)

Which of the following layers of the medallion architecture is most commonly used by data analysts?

- A: None of these layers are used by data analysts
- B: Gold
- C: All of these layers are used equally by data analysts
- D: Silver
- E: Bronze

Correct Answer: B

Question 2. (Single Select)

A data engineering team has created a Structured Streaming pipeline that processes data in micro-batches and populates gold-level tables. The microbatches are triggered every minute.

A data analyst has created a dashboard based on this gold-level data

a. The project stakeholders want to see the results in the dashboard updated within one minute or less of new data becoming available within the gold-level tables.

Which of the following cautions should the data analyst share prior to setting up the dashboard to complete this task?

- A: The required compute resources could be costly
- B: The gold-level tables are not appropriately clean for business reporting
- C: The streaming data is not an appropriate data source for a dashboard
- D: The streaming cluster is not fault tolerant
- E: The dashboard cannot be refreshed that quickly

Correct Answer: A

Question 3. (Single Select)

Which of the following approaches can be used to ingest data directly from cloud-based object storage?

- A: Create an external table while specifying the DBFS storage path to FROM
- B: Create an external table while specifying the DBFS storage path to PATH
- C: It is not possible to directly ingest data from cloud-based object storage
- D: Create an external table while specifying the object storage path to FROM
- E: Create an external table while specifying the object storage path to LOCATION

Correct Answer: E

Question 4. (Single Select)

A data analyst wants to create a dashboard with three main sections: Development, Testing, and Production. They want all three sections on the same dashboard, but they want to clearly designate the sections using text on the dashboard.

Which of the following tools can the data analyst use to designate the Development, Testing, and Production sections using text?

- A: Separate endpoints for each section
- B: Separate queries for each section
- C: Markdown-based text boxes
- D: Direct text written into the dashboard in editing mode
- E: Separate color palettes for each section

Correct Answer: C

Question 5. (Single Select)

A data analyst needs to use the Databricks Lakehouse Platform to quickly create SQL queries and data visualizations. It is a requirement that the compute resources in the platform can be made serverless, and it is expected that data visualizations can be placed within a dashboard.

Which of the following Databricks Lakehouse Platform services/capabilities meets all of these requirements?

- A: Delta Lake
- B: Databricks Notebooks
- C: Tableau

D: Databricks Machine Learning

E: Databricks SQL

Correct Answer: E
